

Are your data in safe hands?

- ✓ How to keep control of critical data when outsourcing work packages to a CRO?
- ✓ How to ensure compliance with international regulatory requirements for Good IT Practices?
- ✓ How to speed up your project by improving information flow and communication?

ACCOVION's IT services and solutions...

... ideally complement our full range of clinical development services. The tight integration of business processes and online access to information creates additional value for our clients. Real-time access to relevant data saves time and ensures transparency throughout the whole project.

ACCOVION has made significant investments in an IT infrastructure for delivery of high-quality services within a demanding environment that will increasingly rely on innovative technology for better performance, data integrity, and security.

Our advanced information technology includes a portfolio of application packages that reflects leading industry standards and customized IT solutions, seamlessly integrated across all activities along the clinical development value chain. Our highly skilled IT staff have longstanding experience in clinical IT solutions. Their in-depth knowledge of all relevant architectures is also available for our customers.

With ACCOVION as your outsourcing partner, your information and communication needs are backed up by professionals who know your business and your industry.

✓ Information Security and IT Quality – no compromises!

We consider our customer's data the most valuable asset in our business relationship: data security is our top priority. Our clinical systems and data are hosted in an ISO-9001 and BS-7799 certified data center with maximum security standards according to FDA guidelines.

Our corporate policies and procedures ensure that we comply with international regulatory requirements set by the FDA, the EMEA, and national regulatory authorities. All phases of the System Development Lifecycle are covered by a comprehensive set of SOPs. All systems are validated and have been assessed for 21 CFR Part 11 compliance.

IT Partnership Solutions

✓ Network Highlights

Our customers and business partners can benefit from advanced network solutions such as Electronic Data Capture (EDC), Remote Access through Virtual Private Network (VPN), application hosting services, common shared or distributed databases, secure file transfer, and secure e-mail connection. A comprehensive set of security policies, guidelines and procedures is in place to ensure confidentiality, integrity and availability of information.

Using Citrix Metaframe technology and secure authentication, we can provide customers with secure and controlled high-speed access to our systems. Or, vice versa: if our customers want us to work on their systems, our open network architecture allows us to meet the customer's networking standards and security policies. Our staff are accustomed to work in a distributed environment, accessing customer databases at various global sites as well as our own databases – all from a single standardized workplace.

ACCOVION can offer you:

- ✓ Secure Remote Access from ACCOVION workplaces to customer systems by dedicated private lines or VPN tunneling according to customer standards
- ✓ Global Secure Remote Access to our systems and databases through ACCOVION Secure Gateway
- ✓ Personalized and role-based online access to ACCOVION's clinical databases
- ✓ Online project status information and interim analysis of clinical data
- ✓ Secure e-mail connection
- ✓ Secure FTP Server to share clinical "raw" data such as CRFs and DCFs
- ✓ ACCOVION SharePoint to facilitate project communication and data exchange
- ✓ Application hosting services for Clinical and Pharmacovigilance systems
- ✓ Archiving of clinical data according to CDISC ODM model
- ✓ IT consulting and support for your internal strategic IT projects

Whatever your requirements may be, we are ready to customize a technical solution that meets your needs and workflow processes. Our IT services are designed to enhance customer focus, quality, and responsiveness.
